

Trial 2020/21

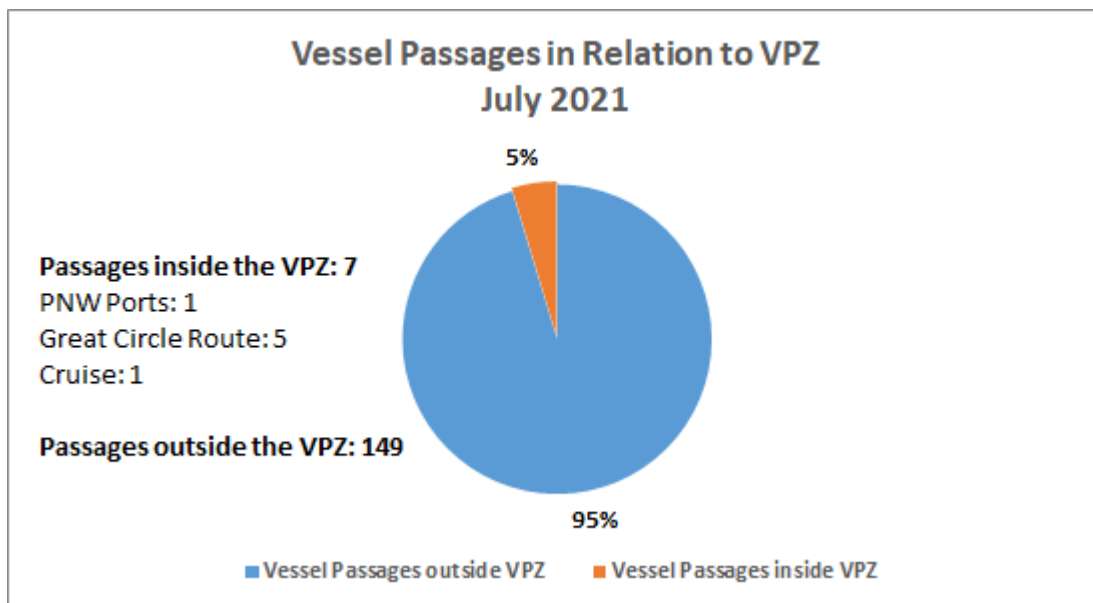

VOLUNTARY PROTECTION ZONE FOR SHIPPING

Progress Report

July 2021 Progress Report

Vessel traffic monitoring information for the [Voluntary Protection Zone \(VPZ\) for Shipping on the West Coast of Haida Gwaii](#) is provided through the [Enhanced Maritime Situational Awareness](#) system and the Pacific Safety Initiative (US). The trial VPZ asks vessels to observe a minimum distance of 50 nm from the west coast of Haida Gwaii¹. For the purpose of data collection, vessel traffic is monitored to 200 nm from the west coast of Haida Gwaii.

During the month of July, a total of **149** commercial vessel transits were observed on the west coast. Of these, **142** transits, representing **95%**, took place outside the VPZ. This is the third consecutive month with 95% of traffic transiting outside the VPZ. July also saw the fewest vessels inside the VPZ thus far.

¹ Commercial vessels over 500 gross tonnage are asked to observe a minimum distance of 50 nm with the exception of vessels transiting between Pacific Northwest ports, which are asked to observe a minimum distance of 25 nm, and cruise ships, which are asked to observe a minimum distance of 12 nm. Fishing vessels, and tugs and barges are not included in the trial.

Trial 2020/21

VOLUNTARY PROTECTION ZONE FOR SHIPPING

Progress Report

Cumulative Vessel Passages in Relation to VPZ Sept 1, 2020 - July 31, 2021

Passages inside the VPZ: 188

PNW Ports: 13

Great Circle Route: 174

Cruise: 1

Passages outside the VPZ: 1480

Total Passages: 1668

■ Vessel passages outside VPZ

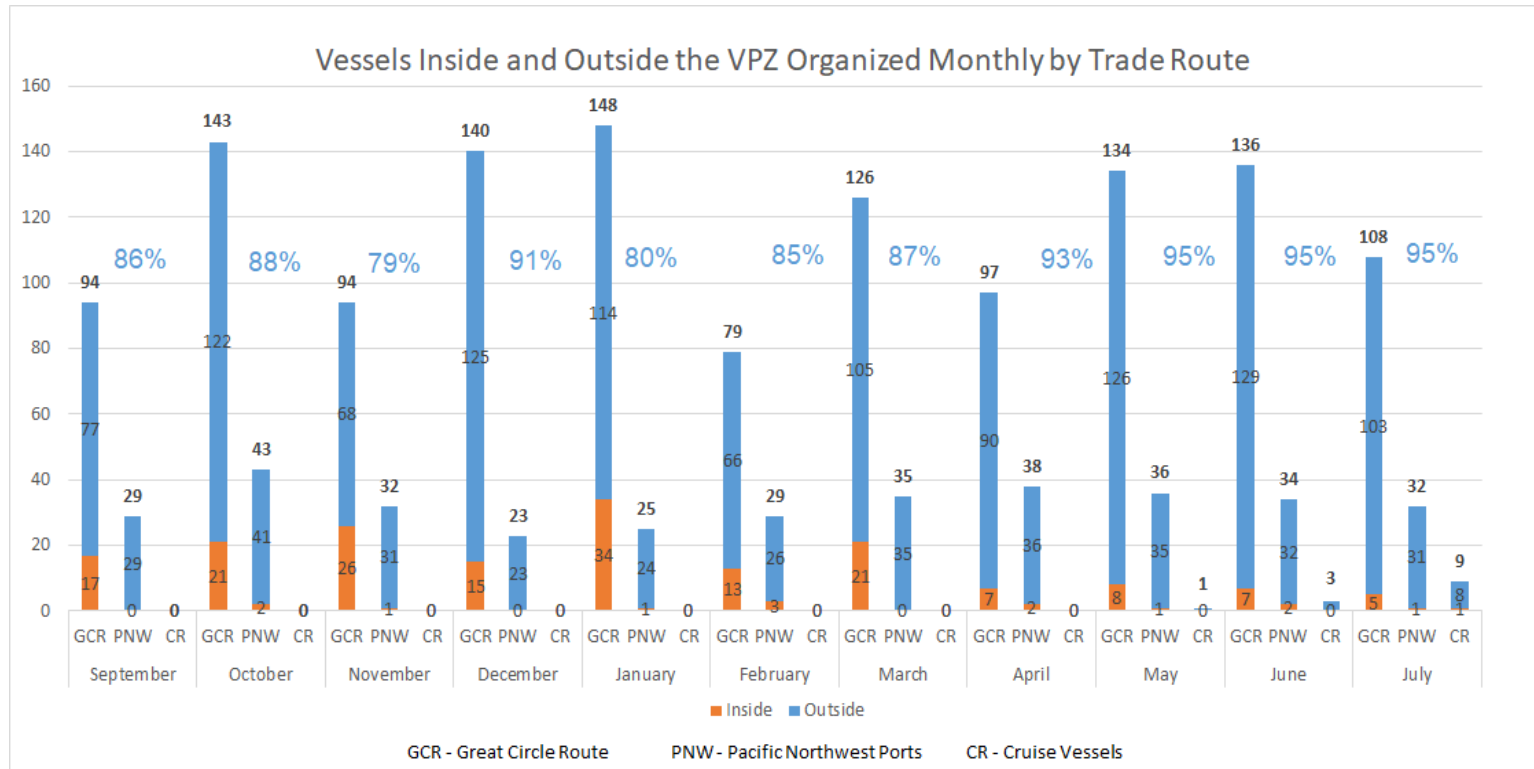

■ Vessel passages inside VPZ
